

# FROZENCUT™

The knife that saves your time.

Hardened stainless steel blade with built-in Heating element able to increase the temperature of the whole blade up to 220 degrees Celsius.

Use heat to cut frozen food with ease. Save time and preserve the Quality of the food for longer time

Two temperature modes can be used on depending of the needs. Low mode for spreading butter and creams and high mode for frozen foods cutting

Intelligent temperature sensor gives to the PCB the blade temperature each 0.03 seconds. Temperature is adjusted automatically when decrease.

Easy and intuitive multi function button. Temperature Low and High selection and On/Off.

## PRODUCT DESCRIPTION

Frozen Cut is a knife with a unique design whose blade is made of high quality Japanese steel that includes the implementation of a new heating technology that raises the temperature of the steel up to 220 degrees, in a seconds

The Knife has a technological innovation that applies heat inside the steel blade by inserting heater cartridges and sensors, which associated with its complex electronics directs the temperature to the desired point, behaving like a household knife in terms of washing and sharpening .

*Frozen Cut has obtained an extensive number of prizes, awards and important recognitions in Europe and the United States like the Eureka or Innova prize.*

Frozen Cut is the first heated knife that will help the lovers of the kitchen and pastry in many of their tasks of food handling, especially the cutting and smearing of frozen foods with total security since it includes an insulating membrane that prevents transmission to the handle that always keeps its touch cold.

## TECHNICAL INFORMATION

NAME OF THE PRODUCT:	FROZEN CUT
CATEGORY:	KITCHEN
STEEL CATEGORY:	Japanese Stainless Steel 420 (SS420j) / 2,2mm
SUPPLY:	AC: AC100-240V / 50-60Hz DC24V 1000mA
PRICE:	TBC
MOQ:	960 units
MEASURES PER UNIT / WEIGHT:	310mm - 125mm - 70mm / 0,432Kg
MC CONTENT / MEASURES:	40 Uds. / 640mm - 510mm - 405mm
MC WEIGHT:	19,3Kg
MEASURE - EUROPEAN PALET:	800x1200mm. Loading height according to operators 12 MC, 207,36 KG.
CERTIFICATIONS / PATENTS:	EU-PAH-ROHS 2.0- REACH-WEE USA PATENT, TRADEMARKT, TUV
SHIPPING TERMS:	FOB Shenzhen
COUNTRY OF ORIGIN:	China
MANUFACTURING TIME:	45 Days
PAY MODE:	30% upon order, 70% upon collection
COMMERCIAL VIDEO FORMATS:	Available in formats 1-2-15 and 28.30 minutes
